the catamaran

Marking a new chapter in Sunreef's quest for a more sustainable cruising experience, the ultra-modern luxury catamaran E was the superyacht builder's first fully-electric Sunreef 60 model, offering guests a silent, vibration-free cruising experience with a responsible approach towards the environment.

The ideal sailing yacht for those looking for the ultimate in relaxation, all you will hear is the gentle lapping of

waves as you sail towards your next dream cove. However, style and luxury are most definitely not compromised, with the yacht boasting opulent spacious interiors with couture detailing – from Burmese teak flooring and Carrara marble to French titanium tableware, no detail is overlooked. With four double cabins to sleep up to eight guests, she's not short on watersports and toys, either – what more could you want?
